

# Introduction - Marketplace

## Introduction to the Marketplace

The marketplace on the DBR77 platform is a hub where users can browse, buy, and sell solutions for the automation and robotization of industrial processes.

### Key Features of the Marketplace

- **Automation and Robotization Requests:** Browse and submit requests for automating and robotizing specific production areas.
- **Buying and Selling:** The platform facilitates direct transactions between suppliers and customers.
- **Integration with the DBR77 Platform:** Products available on the marketplace are fully compatible with the DBR77 ecosystem, ensuring seamless implementation and usage.

### Benefits of Using the Marketplace

- **Access to a Wide Range of Products:** A central hub for all industrial automation needs.
- **Connection to Integration Firms Across Poland:** Collaborate with experts nationwide.
- **Price Transparency:** Clear information about costs and purchase conditions.
- **Support and Consultation:** Access to experts for selecting and integrating the purchased solutions.

---

## Glossary

- **Technological Challenge:** A request submitted to integration firms to implement automation and robotization in production areas. This can involve a new production line or the modernization of an existing setup.
  - **Solution:** A description of the service for implementing automation and robotization in a production company, tailored to specific technological or business needs.
  - **Offer:** A price proposal for a solution on the marketplace, detailing the product, purchase conditions, and costs.
  - **Investor:** An individual or institution interested in funding technology projects that utilize solutions available on the marketplace.
  - **Integrator:** A company or specialist that implements and integrates various technological solutions from the marketplace to create a cohesive system within an enterprise.
